

Where do you want to go?

The ZAPINO electric scooter is a great link between ZAP's personal transporters and 100% electric cars.

Economical and non-pollutant, the ZAPINO is also powerful with an advanced 3000-watt brushless DC wheel motor, perfect for city commuting. Able to reach speeds of 30 mph, the ZAPINO keeps up with city traffic without contributing to city pollution.

The rear wheel motor creates more room on board for additional batteries. There are no belts or chains, which means a more enjoyable ride with less vibration, noise, and smoother acceleration.

Features

- 3000 peak watts, 60 volts
- Intelligent Controller

Colors Options:

Zapino Vitals

- Motor:** 3000W Brushless wheel motor
- Speed:** About 30 mph (48 km/h)
